DETAILED ACTION

Claims 1-21 are pending in the instant application.

Response to Restriction

Applicants' election without traverse of **Group I, Claims 1-8, 18 & 19** is acknowledged. The Examiner also acknowledges the election of the species in Claim 18, as a representative compound. Further, Examiner acknowledges Applicants' request for rejoinder of the **Claims 12, 14, 15, 16, 20 & 21**. Therefore, **Claims 9-17, 20 & 21** are withdrawn from further consideration.

Information Disclosure Statement

Applicants' information disclosure statement (IDS), filed on 07/19/2005 has been considered. Please refer to Applicants' copy of the 1449 submitted herein.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated

by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-8 & 19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over **Claims 1-20** of U.S. Patent No. **6,525,025**. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are drawn to overlapping subject matter. For instance, the compounds according to formula I in the instant application wherein **X = O-W-Z** corresponds to the compounds according to formula I of the **'025 Patent** when **R¹ =**

halo. Further, the 3rd compound in the '025 Patent in column 84 correlates to the 4th compound on page 49 in the instant application, (only differing by Iodide isotope).

Therefore, although the claims of the instant application are not identical to those of the '025 Patent, overlapping inventions are claimed.

Claim Objections

Claims 2 & 18 are objected to as being dependent upon a rejected base **Claim 1**, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
